

Instructions for getting a list of Adagio modules / versions currently installed:

1. On any Adagio module Help Menu, click on System Status.

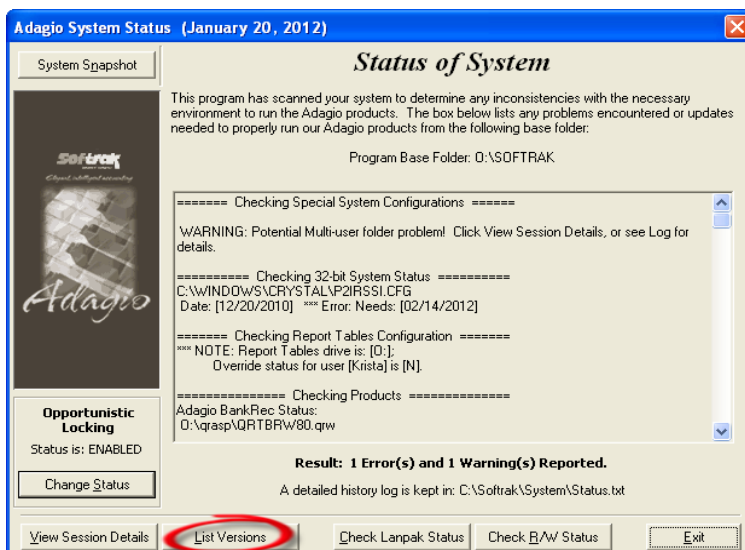

If the option is not available, then, using Windows explorer, navigate to x:\softtrak\system folder, where x is the drive on which your Adagio is installed. Double click on the file called "chksys.exe". The following window will appear:

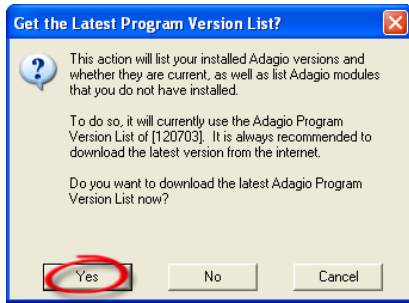

2. Click on the "Proceed" button.

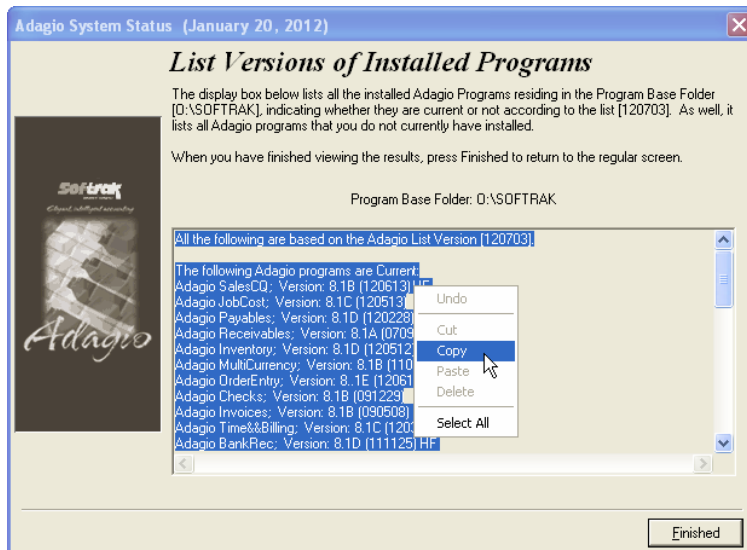

3. After scanning and checking the system configuration, the following screen will then appear:

4. Click the “List Versions” button and then click “Yes” in the following window..

5. If you would like a permanent copy:
 1. **Open:** Make a New email
 2. **Highlight:** put cursor in the list in the List Versions window, click the right mouse button, click “Select All”

3. **Copy:** click the right mouse button, click “Copy”
 4. **Target:** position cursor in the body of the email you created
 5. **Paste:** click the right mouse button and click “Paste”
 6. **Save** the email or send to support@accsysolutions.com
6. To complete the System Status process, click the “Finished” button from the List Versions window and then the “Exit” button.
