New Versions of Adagio Modules

Several new versions of Adagio modules have been released in 2013. Are you taking advantage of the new features? Click the module names for a more complete list of new features.

Adagio Ledger

- locate a transaction anywhere in the GL by description, reference, amount, or any other field within the transaction
- when viewing a transaction, the full, balanced journal entry is displayed
- view, reprint, or recover any batch from the Batch Status Inquiry grid
- post to any year
- restrict subsidiary ledgers that can post to a specific account
- automatically discard \$0.00 transactions generated by subsidiary ledgers

Adagio OrderEntry

- added Report Favorites and Report Sets

Adagio Payables

- print the Aged Overdue Payables report calculated as of dates in the past
- the Open Payables report allows you to select a 'Calculate balance as of date' earlier than the Last Clearing Date
- tracks T5018 payment totals and prints T5018 forms for Canadian vendors who are your subcontractors
- added Report Groups

Adagio PurchaseOrders

- standard Adagio "look and feel"
- AdagioPDF installed and full support of Adagio ePrint
- added Report Favorites, Report Sets, User Preferences, Styles and Filters
- edit multiple documents at the same time
- find vendors by name or phone; find items by description
- GridView views can be added on the Inquiry menu
- Day End is much faster

Adagio Receivables

- attach unpaid invoices when emailing, faxing, or printing statements (ePrint users only)
- attach a PDF document (such as a promotional item or product literature) when sending statements

Adagio SalesAnalysis

- enhanced Report Favorites
- enhanced Report Sets
- supports Adagio ePrint

Adagio GridView

- can hyperlink to any document such as PDFs, Word documents, or JPG image files
- four new date functions
