

ClockVIEW: Employee Time & Attendance Software

With ClockVIEW, you are empowered with the most robust and cost effective employee time and attendance software available. Simplify employee time tracking, eliminate the tedious aspects of employee time and attendance, automate processes, and save money with AccSys Solutions' ClockVIEW time and attendance software.

Regardless of company size, ClockVIEW typically provides a return on investment within a few months. Start saving money today by eliminating data entry redundancy, reducing employee time card audit time, eliminating errors, introducing automation, and eliminating employee overpayment for long breaks, late arrivals, and early departures.

AccSys Solutions' ClockVIEW time and attendance software allows you to customize nearly every feature and report detail to ensure your time and attendance system matches the exact organization of your company and fits your specific needs. Providing accurate information that is available anytime you need it - anywhere in the world - ClockVIEW is easily integrated with just about every employee time clock, payroll system, ERP system, as well as other systems.

If you're ready to automate your time and attendance, visit www.AccSysSolutions.com, email info@accsysolutions.com, or phone 1.888.534.4344.

Employee Scheduling

AccSys Solutions' ClockVIEW time and attendance software also includes unlimited basic employee scheduling. You can quickly and easily establish as many standard schedules as you'd like, as well as establishing a default schedule. For more robust employee scheduling functionality, ClockVIEW is integrated with AccSys Solutions' advanced scheduling software, ShiftVIEW.

Technical Information

ClockVIEW is available in a Software as a Service (SaaS) model or licensed for use on your systems. ClockVIEW can function either as a batch or real-time system when used with AccSys Solutions' data synchronization software, GetDATA and PutDATA. Together, ClockVIEW, GetDATA, and PutDATA automate the data synchronization process between each system.

Most browsers are supported, including Chrome, Edge, Firefox, Internet Explorer and Safari.
